Sign up for an Acer ID and enjoy great benefits

1. Ensure you are connected to the Internet.
2. Open www.acer.com and select your country.
3. Select Support > REGISTER A PRODUCT.
4. Sign up for an Acer ID or sign in if you already have an Acer ID.

Register your Acer product

After we receive your product registration, you will be sent a confirmation email with important data. Keep this email in a safe place.

Manage your registered products

Once you have completed the registration process, you can log onto account.acer.com using your Acer ID and password to see and manage all your registered products.

Note
It may take a few days for your information to be updated to the database.

GETTING STARTED

Turn on your Chromebook

On the Chromebook, the power button is located at the lower-left corner of the screen. A "welcome" screen will appear when the Chromebook first boots up.

Select your language settings

Use the "Select your language" drop-down list to choose your default language setting. If there is more than one way to type in your language, you may be prompted to select a keyboard input method as well.

Connect to a network

Select a network from the "Select a network" list to connect to the Internet. If network access is protected, you will need an access password to connect to it.

Note
If available, we recommend you use an ethernet connection.

Accept the Terms of Service

Once connected to a network, accept the Terms of Service. Your Chromebook will then download any available system updates, so you automatically get the latest Chrome OS features.

First-time sign-in

Create a new Google Account

You can create a new Google Account if you don’t already have one. Select Create a Google Account to set up a new account. A Google Account gives you access to useful web services developed by Google, such as Gmail, Google Drive, and Google Calendar.
Browse as a guest

You can also use the Chromebook without a Google Account by selecting **Browse as a Guest**.

Sign in to your Google Account

If you already have a Google Account, enter your username and password in the sign-in box that appears and select the **Sign in** button.

![Sign in to your Chromebook](image)

**Important**

Sign in with your primary Google Account. This account will be set as the owner and is the only account that will be able to change certain Chrome settings.
Now that you are done setting it up, let us show you around your new Acer Chromebook.

USB 3.0 information

- USB 3.0 compatible ports are blue.
- Compatible with USB 3.0 and earlier devices.
- For optimal performance, use USB 3.0-certified devices.
- Defined by the USB 3.0 specification (SuperSpeed USB).

The table lists some of the icons and their descriptions found in the Status area.
You can enhance your Chromebook with extra web applications (apps, for short) and features for the browser (also known as extensions). Apps work like regular software programs for desktop computers, except they run entirely on the web. Extensions provide custom features and functionality for the Chrome browser. You can find both apps and extensions through the Chrome Web Store, a site dedicated to resources developed specifically for Chromebooks.

Managing apps

**Note**

Certain apps and browser extensions may not be available in all countries and regions. The contents and design of the Chrome Web Store may vary by region. Updates may add new categories or change how to navigate the Chrome Web Store at any time.

**Installing new apps from the Chrome Web Store**

1. Select the **Launcher** icon.
2. Select **All Apps** (or type "Web Store").
3. Select **Web Store**.
4. You can then browse through the app categories in the left column or search for a specific type of app using the search box.
5. When you find an app that you would like to add, select it and then select **ADD TO CHROME**.
6. A verification window will pop up, select **Add** to download and install the app, or select **Cancel**.

To open your new app, select the **Launcher**, then **All Apps** (or type the name of your new app), and then select the app.

**Removing apps from Chrome OS**

1. Select the **Launcher** icon.
2. Select **All Apps** (or type the name of the desired app).
3. Two-finger tap (see Touchpad on page 8) on the app you want to remove.
4. Select **Remove from Chrome...** or **Uninstall**.

### Note
_Some apps such as the Chrome web browser cannot be uninstalled._

#### Pin an app to the shelf

1. Select the **Launcher** icon.
2. Select **All Apps** (or type the name of the desired app).
3. Locate and two-finger tap the desired app icon.
4. Select **Pin to shelf**.

To reorder the apps on the shelf, just drag them around.

#### Unpin an app from the shelf

1. Locate and two-finger tap the desired app icon from the shelf.
2. Select **Unpin**.

### Google Drive

All files saved to your **Google Drive** are saved online and are accessible to other devices, such as your smartphone or tablet. Files saved to the **Downloads** folder are saved to your local drive and are only accessible to your Chromebook.

### Note
>You must be connected to the Internet to do the following Google Drive operations.

### Difference between Drive and Files apps

**Google Drive** is a web-based storage service offered by Google, and the **Files** app is the onboard storage system for your Chromebook. Because your Chromebook makes heavy use of the web, you can easily access files both from **Google Drive** and those that are stored locally by using the **Files** app on your Chromebook. To use the **Files**
app, select the *Files* icon in the apps list, or use the keyboard shortcut <Alt> + <Shift> + <M>.

This user manual uses *Google Drive* and *Files* interchangeably when giving instructions regarding accessing files.

**Creating a new document**

1. From the Apps list, select the **Google Drive** icon ( ).
2. Select **NEW** and select the type of document you want to create.

**Note**

*For an alternative method of creating documents, see How to create documents on page 19.*

**Sync files from Downloads to Google Drive**

1. Select the **Launcher** icon.
2. Select **All Apps** (or type "Files").
3. Select the **Files** icon.

4. Select the files that you want to upload.
5. Drag-and-drop the files to *My Drive*.

Enable offline access to Google Drive files

You can access files stored on your Google Drive while offline, but first you must enable offline access:

1. Select the **Launcher** icon.
2. Select **All Apps** (or type "Files").
3. Select the **Files** icon and then select **My Drive**.
4. Select the file(s) you want to access offline.
5. Two-finger tap (see Touchpad on page 8) to bring up the context sensitive menu and select **Available offline**. A check mark will appear to indicate the file is available offline.

Gmail 📧

Composing an email

1. Select the **Launcher** icon.
2. Select **All Apps** (or type "Gmail").
3. Select the **Gmail** icon and then **COMPOSE**.
4. Enter the recipient’s email address, the subject, and the message.
5. When you are finished composing your message, select **Send**.
YouTube

YouTube is a video-sharing website on which users can upload, share and view videos. You can access it by doing the following:

1. Select the Launcher icon.
2. Select All Apps (or type "YouTube").
3. Select the YouTube icon.

Playing video or audio files

Your Chromebook has a built-in media player to play audio and video files. To play a file, double-click on an audio or video file in your Files app.

<table>
<thead>
<tr>
<th>Media type</th>
<th>Supported formats</th>
</tr>
</thead>
<tbody>
<tr>
<td>Audio / Video</td>
<td>.3gp, .avi, .mov, .mp4, .m4v, .m4a, .mp3, .mkv, .ogv, .ogm, .ogg, .oga, .webm, .wav</td>
</tr>
</tbody>
</table>

Other Supported File Types

Your Chromebook supports a number of other file formats.

<table>
<thead>
<tr>
<th>File type</th>
<th>Supported formats</th>
</tr>
</thead>
<tbody>
<tr>
<td>Microsoft Office files</td>
<td>.doc, .docx, .xls, .xlsx, .ppt (read-only), .pptx (read-only)</td>
</tr>
<tr>
<td>Images</td>
<td>.bmp, .gif, .jpg, .jpeg, .png, .webp</td>
</tr>
<tr>
<td>Compressed</td>
<td>.zip, .rar</td>
</tr>
<tr>
<td>Other</td>
<td>.txt, .pdf (read-only)</td>
</tr>
</tbody>
</table>
Your Chromebook is a new type of computer that works somewhat differently than what you may be used to, so you might like to know how easy and useful things are when using it. Here are some tips and tricks.

Documents

How to create documents

1. Press the Search key on your keyboard or select the Launcher icon.

2. Select All Apps (or type "Google Docs", "Google Sheets", or "Google Slides" depending on the type of document you want to create) Create word processing files with Google Docs, spreadsheets with Google Sheets, and presentations with Google Slides.

3. Select Google Docs, Google Sheets, or Google Slides.

That’s it. You’ve just created a new document in a few seconds. With your new document, you can add text, insert images, change the font, make it bold, underline it, italicize it – you get the gist. Most of the formatting and other stuff you might be familiar with from other productivity suites like Microsoft Office you can do with Google Docs.

Note

For an alternative method of creating documents, see Creating a new document on page 16.
Finding your documents

All documents you create are saved to your Google Drive where they are online and accessible to other devices, such as your smartphone or tablet. To find your documents, do the following:

1. Select the Launcher icon.
2. Select All Apps (or type "Google Drive").
3. Select the Google Drive icon.
4. Select My Drive (or whatever sub-folder you’ve created to put your files in).

Since your files are saved in Google Drive, they are saved online and available anywhere you have internet access. To access your files from any internet-connected computer do the following:

1. Open the computer’s web browser.
2. In the browser’s address bar, type "drive.google.com" (this is the Google Drive web address).
3. Login using your Google account username and password.
4. Select My Drive (or whatever folder you’ve created to put your files in).

How to share documents with other users

1. Select the Share button in the upper right corner of your document.
2. Add people by typing in their email address. The sharing option works with your Gmail contacts, so as you type your email contacts appear for you to quickly select.
3. After you select Done, they’ll receive an email letting them know a document has been shared with them.
How to start a video chat

For all you Skype users out there, Google+ Hangouts are free video chats for up to ten people. To make a Hangouts video call, do the following:

1. Press the Search key on your keyboard or select the Launcher icon.
2. Select All Apps (or type "Hangouts").
3. Select the Hangouts call icon.
4. Type in the name or email address of a person.
5. Select the Invite button to start your Hangout.

How to listen to music

1. Press the Search key on your keyboard or select the Launcher icon.
2. Select All Apps (or type "Play Music").

For other streaming apps like Pandora, Spotify, Rdio, Deezer and more (availability varies by country):

1. Press the Search key on your keyboard or select the Launcher icon.
2. Select All Apps (or type "Web Store").
3. Select Web Store to go to the Chrome Web Store.
4. Search for Pandora or other music apps.
5. When you find what you want, select the ADD TO CHROME button.
How to watch videos, TV, or movies

1. Press the **Search** key 🔍 on your keyboard or select the Launcher icon 📦.
2. Select **All Apps** and select one of the following options:
   a. Select **YouTube** 🎥 to view a vast amount of user-uploaded videos covering nearly everything imaginable.
   b. Select **Play Movies** 🎢 to watch the movies and TV shows you love.
   c. To find more entertainment apps like Netflix, Flixster, and more (availability varies by country), select **Web Store** 🌐 to go to the **Chrome Web Store**. Then, search for "Netflix" or other entertainment apps.

**Note**
Play Movies may not be available in all countries and regions. Google Play’s current list of country availability for apps and digital content, visit [https://support.google.com/googleplay/answer/2843119?hl=en](https://support.google.com/googleplay/answer/2843119?hl=en)

Working with Microsoft Office (Word, Excel, and Powepoint) documents

Open and edit Microsoft Office files using Google’s office compatibility mode

1. Press the **Search** key 🔍 on your keyboard or select the Launcher icon 📦.
2. Select **All Apps** (or type "Files").
3. Select the **Files** 📦 icon.
4. Double-click on any **Microsoft Office** file stored in Google Drive or on an external hard drive or USB flash drive connected to your Chromebook.

Google Chrome automatically opens and enables limited editing of the document.
Convert Microsoft Office files to Google Drive formats

1. Press the Search key on your keyboard or select the Launcher icon.
2. Select All Apps (or type "Files").
3. Select the Files icon.
4. Double-click on any Microsoft Office file stored in Google Drive or on an external hard drive or USB flash drive connected to your Chromebook.
5. Select File > Save as Google Docs, Slides, or Sheets (format depends on the type of document).

Export Google Drive documents as Microsoft Office files

1. Press the Search key on your keyboard or select the Launcher icon.
2. Select All Apps (or type "Docs").
3. Select Google Docs, Sheets, or Slides (depending on the document you want to create).
4. After creating the content of your document, select File > Download as and select the type of format you want to save as.
5. The file is saved to the download section of the Files app.

Opening Microsoft Office files using Microsoft’s Office Online apps from the Chrome Web Store

Another option for working with Microsoft Office files is to use Microsoft’s own free web-based Office Online tools. You can download the Word Online, Excel Online, and PowerPoint Online apps from the Chrome Web Store (you’ll need to create a Microsoft
account if you don’t already have one). Then, you can login and create files or upload files you have already created and edit them.

### Note
Office Online programs save files you create exclusively to Microsoft’s own OneDrive cloud storage. Though you can download a file you create and then move it to Google Drive or a removable storage device, you cannot save it directly to those locations. Also, to work on a file you’ve already created, you must first upload it to OneDrive by selecting **Open from OneDrive** from within whichever Office Online product you are using (you can install the OneDrive app from the Chrome Web Store as well).

### How to use your Chromebook when there’s no internet

The Chrome Web Store contains useful offline apps ([see Installing new apps from the Chrome Web Store on page 14](#)). You’re able to filter your app search by selecting the **Runs Offline** checkbox. For those times you don’t have an internet connection, these apps help you stay productive and entertained. A few of the pre-installed options are described below.

**Gmail Offline**

### Note
The first time you use Gmail Offline you MUST be connected to the internet to enable offline viewing.

1. Press the **Search** key on your keyboard or select the Launcher icon 🎥.
2. Select **All Apps** (or type "Gmail Offline").
3. Select the **Gmail Offline** 🌐 icon.
4. Use the app like you normally would. It’ll update and send your emails the next time you log on to the internet.
Google Drive

⚠️ Important
Any changes you make to a current document or any document you create while offline are saved locally on your computer and will not be seen if you open the document from Google Drive on another computer or device. The changes will only be reflected in the Google Drive online version of the document the next time you connect to the internet and access Google Drive.

1. Press the Search key on your keyboard or select the Launcher icon.
2. Select All Apps (or type "Google Drive").
3. Select the Google Drive icon.
4. Open a Google document you have already created or create one as you normally would (see Creating a new document on page 16). Notice the offline icon displays next to the file name reminding you that you are working on this document while not connected to the internet.
5. Make your desired changes. The next time you are online and have Google Drive open, your local changes will upload to Google Drive.

Note
If you make changes to a Google document while offline and someone else makes changes to the document as well (for example, if the document is shared with someone else), the next time you are online and have Google Drive open, your changes will merge with the other person’s changes.

You can’t open and access every type of file you have saved in Google Drive when there is no internet connection. To enable offline access to file types other than Google documents when offline, see Enable offline access to Google Drive files on page 17.
Use the settings menu to adjust the various options for your Chromebook. To access the settings menu do the following:

1. Select the **Status** area of the shelf in the lower-right corner of the screen (where your account picture appears).
2. Select **Settings**.
3. To show the advanced settings, scroll to the bottom and select **Show advanced settings**...

**Note**
*Using default settings, the Chromebook will enter hibernate mode after one hour.*

**Changing the language settings**

1. Select the **Status** area of the shelf in the lower-right corner of the screen (where your account picture appears).
2. Select **Settings**.
3. Select **Show advanced settings**...
4. Scroll down and select **Language and input settings**...
5. Select **Add** to add additional languages.
6. To enable a language for keyboard input, under *Input Method* select the checkbox next to your desired input method.
7. Select **Done** when finished.

**Changing the clock settings**

You can change the time format and time zone on your Chromebook. If the date or time is incorrect on your Chromebook, try adjusting the time zone.
To change the time zone:
1. Select the **Status** area of the shelf in the lower-right corner of the screen (where your account picture appears).
2. Select **Settings**.
3. Select **Show advanced settings**...
4. Scroll down and select the drop down box next to **Time zone**.

**Customizing appearance**

**Customizing the wallpaper**

1. Select the **Status** area of the shelf in the lower-right corner of the screen (where your account picture appears).
2. Select **Settings**.
3. Select **Set wallpaper**.
4. Select a preloaded wallpaper or select **Custom**, plus sign, and then **Choose File** to select your own image.
5. Once selected, select **OPEN**.
You can also choose **Surprise Me** to have the wallpaper change randomly.

**Customizing the theme**

1. Select the **Status** area of the shelf in the lower-right corner of the screen (where your account picture appears).
2. Select **Settings**.
3. Select **Get themes**.
4. You’ll be taken to the **Chrome Web Store**, where you can find extra resources for the Chrome browser.
5. Once you find a theme that you’d like to try out, select it and then select **ADD TO CHROME**.

**Setting up a printer**

You can use the **Google Cloud Print** service to send print requests to many types of traditional cabled printer and wireless "cloud ready" printers; however, not all printers are supported.
To learn more about Google Cloud Print and how to set up your printer, reference Google’s own Chromebook Help to find comprehensive information on this topic. To access Chromebook Help, do the following:

1. Press the **Search** key on your keyboard or tap the search icon.
2. Select **All Apps** (or type "Get Help").
3. Select the **Get Help** icon.
4. Select **Printing**.

### Updating Chrome OS

#### Automatic update

Each time you turn on your Chromebook, it automatically checks for updates. When an update is available, this update icon will appear in the status area. To apply the update:

1. Select the **Status** area of the shelf in the lower-right corner of the screen (where your account picture appears).
2. Select **Restart to update**.
3. Your Chromebook will shutdown and automatically restart, with the update applied.

#### Manual update

To manually check for an update or check what version of Chrome OS you are using:

1. Select the **Status** area of the shelf in the lower-right corner of the screen (where your account picture appears).
2. Select **Settings**.
3. At the top select **About Chrome OS**.
4. In the dialog that opens, select **Check for and apply updates**. If any updates are available, they will be displayed on the page.
Resetting your Chromebook

There may be times when you want to reset your Chromebook (for example, removing your personal information and settings). Completely resetting your Chromebook is known as "Powerwashing", which is basically factory resetting your computer. After powerwashing, your Chromebook will look like it did out of the box (including all apps that came pre-installed). To powerwash your Chromebook, do the following:

1. Select the **Status** area of the shelf in the lower-right corner of the screen (where your account picture appears).
2. Select **Settings**.
3. Select **Show advanced settings...**
4. In the **Powerwash** section, select **Powerwash**.
5. Select **Restart**.

---

**Important**

Do not modify your Chromebook’s hardware yourself. Doing so will cause the update function to no longer work. Please get in touch with your dealer or an authorized service center. Visit www.acer.com to find an authorized service site.

**Important**

Powerwashing your Chromebook will remove all local settings, data, and programs from your hard drive. Backup any data on your hard drive that is not saved online by moving it to Google Drive and waiting for it to sync.
Online and offline help

Additional help is available both online and offline. *Chromebook Help* is installed on your Chromebook and doesn’t require internet access. It covers basic troubleshooting as well as more detailed information about Chrome OS and using your Chromebook.

**Note**

*Some sections in Chromebook Help have web links, which require you have internet access to view the additional information.*

To access *Chromebook Help*, do the following:

1. Press the **Search** key on your keyboard or select the Launcher icon.
2. Select **All Apps** (or type "Get Help").
3. Select the **Get Help** icon.

Alternatively, you can access *Help* by doing the following:

1. Select the **Status** area of the shelf in the lower-right corner of the screen (where your account picture appears).
2. Select the question mark "?".
