## Technical Documentation of (EU) No 617/2013

Product typeIntegrated desktop computerProduct categoryBDManufacturer name, addressAcer Italy s.r.l, Via Lepetit, 40, 20020 Lainate (MI) ItProduct model numberAspire C27-865 BAspire C27-8Year of manufacture2018ETEC allowance with capability adjustments when discrete graphics cards are disabled (from 1 January 2016)Not applicable 156 kWh/yearETEC allowance with capability adjustments when discrete graphics cards are enabled (from 1 January 2016)156 kWh/yearWhether all discrete graphics card are enabled during the testYseYesWhether switchable graphics mode with UMA is driving the display during the testNoNo	65 D		
Manufacturer name, addressVia Lepetit, 40, 20020 Lainate (MI) ItProduct model numberAspire C27-865 BAspire C27-8Year of manufacture2018ETEC allowance with capability adjustments when discrete graphics cards are disabled (from 1 January 2016)notNot applicableETEC allowance with capability adjustments when discrete graphics cards are enabled (from 1 January 2016)156 kWh/year192 kWWhether all discrete graphics card are enabled during the testYseYesWhether switchable graphics mode with UMA is driving the display during the testNoNo	65 D		
Via Lepetit, 40, 20020 Lainate (MI) ItProduct model numberAspire C27-865 BAspire C27-8Year of manufacture2018ETEC allowance with capability adjustments when discrete graphics cards are disabled (from 1 January 2016)Not applicableETEC allowance with capability adjustments when discrete graphics cards are enabled (from 1 January 2016)Not applicableWhether all discrete graphics card are enabled during the testYseYesWhether switchable graphics mode with UMA is driving the display during the testNoNo	65 D		
Year of manufacture2018ETEC allowance with capability adjustments when discrete graphics cards are disabled (from 1 January 2016)notNot applicableETEC allowance with capability adjustments when discrete graphics cards are enabled (from 1 January 2016)156 kWh/yearWhether all discrete graphics card are enabled during the testYseYesWhether switchable graphics mode with UMA is driving the display during the testNoNo			
ETEC allowance with capability       not       Not applicable         adjustments when discrete graphics cards are disabled (from 1 January 2016)       not       Not applicable         ETEC allowance with capability       adjustments when discrete graphics cards adjustments when discrete graphics cards are enabled (from 1 January 2016)       156 kWh/year       192 kW         Whether all discrete graphics card are enabled during the test       Yse       Yes         Whether switchable graphics mode with UMA is driving the display during the test       No       No	h/year		
adjustments when discrete graphics cards are disabled (from 1 January 2016)Not applicableETEC allowance with capability adjustments when discrete graphics cards are enabled (from 1 January 2016)156 kWh/year192 kWWhether all discrete graphics card are enabled during the testYesYesWhether switchable graphics mode with UMA is driving the display during the testNoNo	h/year		
are disabled (from 1 January 2016)         E <sub>TEC</sub> allowance with capability         adjustments when discrete graphics cards         156 kWh/year         192 kW         are enabled (from 1 January 2016)         Whether all discrete graphics card are         enabled during the test         Whether switchable graphics mode with         UMA is driving the display during the test	h/year		
ETEC allowance with capability adjustments when discrete graphics cards are enabled (from 1 January 2016)156 kWh/year192 kWWhether all discrete graphics card are enabled during the testYseYesWhether switchable graphics mode with UMA is driving the display during the testNoNo	h/year		
ETEC allowance with capability adjustments when discrete graphics cards are enabled (from 1 January 2016)156 kWh/year192 kWWhether all discrete graphics card are enabled during the testYseYesWhether switchable graphics mode with UMA is driving the display during the testNoNo	h/year		
are enabled (from 1 January 2016)YesWhether all discrete graphics card are enabled during the testYseYesWhether switchable graphics mode with UMA is driving the display during the testNoNo	h/year		
are enabled (from 1 January 2016)YesWhether all discrete graphics card are enabled during the testYseYesWhether switchable graphics mode with UMA is driving the display during the testNoNo			
Whether all discrete graphics card are enabled during the testYseYesWhether switchable graphics mode with UMA is driving the display during the testNoNo			
enabled during the testWhether switchable graphics mode with UMA is driving the display during the testNo			
Whether switchable graphics mode with UMA is driving the display during the test No			
UMA is driving the display during the test			
E <sub>TEC</sub> of highest power-demanding			
configuration 57.85 kWh/year 58.46 kW	h/year		
	2 Watt		
	8 Watt		
Sleep mode with WOL enabled power	4 \/\-++		
demand 0.38 Watt 0.4	4 Watt		
Off mode power demand 0.25 Watt 0.25	9 Watt		
Off mode with WOL enabled power	0 W - H		
demand 0.27 Watt 0.3	0.3 Watt		
Maximum power demand Not applicable Not applicable			
Internal power supply (IPS) efficiency at			
10 %, 20 %, 50 % and 100 % of rated Not applicable Not applicable			
output power			
External power supply's (EPS) average			
active efficiency 89.95%	9.95%		
Noise levels (the declared A-weighted			
sound power level, L <sub>WAd</sub> ) of idle mode	2.5 B		
Noise levels (the declared A-weighted			
sound power level, L <sub>WAd</sub> ) of "HDD random 3.2 B	3.2 B		
seek" mode			
Minimum number of loading cycles that			
the batteries can withstand Not applicable Not applicable	Not applicable		
Configuration of memory (GB) 4~8 4~8	4~8		

Configuration of internal storage (piece)	1	1		
Configuration of discrete television tuner	0	0		
(piece)	0	Ū		
Configuration of discrete audio card	0	0		
(piece)	0			
Configuration of discrete graphics cards	1	1		
(piece) Configuration of discrete graphics cards				
category	G3	G3		
The external package of the notebook				
provides the information, "The battery in				
this product cannot be easily replaced by	Not applicable	Not applicable		
users themselves."				
For products with an integrated display,	0 mg	0 mg		
the total content of mercury is	-			
Measurement methodology for E <sub>TEC</sub>	COMMISSION REGULATION (EU) No 617/2013 of 26 June 2013 implementing Directive 2009/125/EC of the European Parliament and of the Council with regard to ecodesign requirements for computers and computer servers: ANNEX II Ecodesign requirements and timetable: 1.1.1. E <sub>TEC</sub> formula.			
Measurement methodology for idle mode	EN 62623:2013 — Desktop and notebook computers — Measurement of energy consumption: 5.2. Test setup; 5.3.4. Measuring long idle mode; 5.7. True RMS watt meter specification; 5.8. True RMS watt meter accuracy; Annex E.2 (informative) ENERGY STAR <sup>®</sup> V5 compliant testing methodology.			

Measurement methodology for sleep mode	EN 62623:2013 — Desktop and notebook computers — Measurement of energy consumption: 5.2. Test setup; 5.3.3. Measuring sleep mode; 5.4. Test conditions; 5.7. True RMS watt meter specification; 5.8. True RMS watt meter accuracy.
Measurement methodology for off mode	EN 62623:2013 — Desktop and notebook computers — Measurement of energy consumption: 5.2. Test setup; 5.3.2. Measuring off mode; 5.4. Test conditions; 5.7. True RMS watt meter specification; 5.8. True RMS watt meter accuracy.
Measurement methodology for IPS efficiency	Not applicable
Measurement methodology for EPS efficiency	EN 50563:2011 External a.c.—d.c. and a.c.—a.c. power supplies — Determination of no-load power and average efficiency of active modes.

Measurement methodology for noise level	6. Method for determination of sound power levels of equipment in reverberation			
	test rooms; 7. Method for determination of sound power levels of equipment under essentially free-field conditions over a reflecting plane; Annex C.15 Equipment category: personal computers and workstations.			
Measurement methodology for battery loading cycles	Not applicable			
Sequence of steps for achieving a stable condition with respect to power demand	EN 62623:2013 — Desktop and notebook computers — Measurement of energy consumption: 5.2. Test setup; 5.3.2. Measuring off mode; 5.3.3. Measuring sleep mode; 5.3.4. Measuring long idle mode.			
Description of how sleep mode was selected or programmed	EN 62623:2013 — Desktop and notebook computers — Measurement of energy consumption: 5.2. Test setup; 5.3.3. Measuring sleep mode.			
Description of how off mode was selected or programmed	EN 62623:2013 — Desktop and noteboo computers — Measurement of energy consumption: 5.2. Test setup; 5.3.2. Measuring off mode.			

Sequence of events required to reach the mode where the equipment automatically changes to sleep mode Sequence of events required to reach the mode where the equipment automatically changes to off mode	ENERGY STAR <sup>®</sup> Program Requirements Product Specification for Computers, Eligibility Criteria Version 6.0, Rev. Oct- 2013: 1.D.4 Sleep Mode. Not applicable
The duration of idle state condition before the computer automatically reaches sleep mode, or another condition which does not exceed the applicable power demand requirements for sleep mode	30 minutes
The length of time after a period of user inactivity in which the computer automatically reaches a power mode that has a lower power demand requirement than sleep mode	30 minutes
The length of time before the display sleep mode is set to activate after user inactivity	10 minutes
User information on the energy-saving potential of power management functionality	<u>http://www.energystar.gov/index.cfm?c=po</u> <u>wer_mgt.pr_power_mgt_users</u>
User information on how to enable the power management functionality	http://www.energystar.gov/index.cfm?c=po wer_mgt.pr_power_mgt_users
Test parameter for ambient temperature	25 ℃
Test parameter for test voltage	230 V
Test parameter for frequency	50 Hz
Test parameter for total harmonic distortion of the electricity supply system	3 %

Test parameter for information and documentation on the instrumentation, set-up and circuits used for electrical testing	Set-up diagram used for electrical testing :  AC Power Cord Power Cord Unit Under test Digital Power Meter
