Information for Your Safety and Comfort

Read these instructions carefully. Keep this document for future reference. Follow all warnings and instructions marked on the product.

Turning the product off before cleaning

Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

Caution for plug as disconnecting device

Observe the following guidelines when connecting and disconnecting power to the external power supply unit:

- Install the power supply unit before connecting the power cord to the AC power outlet.
- Unplug the power cord before removing the power supply unit from the projector.
- If the system has multiple sources of power, disconnect power from the system by unplugging all power cords from the power supplies.

Caution for Accessibility

Be sure that the power outlet you plug the power cord into is easily accessible and located as close to the equipment operator as possible. When you need to disconnect power to the equipment, be sure to unplug the power cord from the electrical outlet.

Warnings!

- Do not use this product near water.
- Do not place this product on an unstable cart, stand or table. If the product falls, it could be seriously damaged.
- Slots and openings are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug or other similar surface.

This product should never be placed near or over a radiator or heat register, or in a built-in installation unless proper ventilation is provided.

- Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind onto or into the product.

- To avoid damage of internal components and to prevent battery leakage, do not place the product on a vibrating surface.
- Never use it under sporting, exercising, or any vibrating environment which will probably cause unexpected short current or damage rotor devices.

Using electrical power

- This product should be operated from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
- Do not allow anything to rest on the power cord. Do not locate this product where people will walk on the cord.
- If an extension cord is used with this product, make sure that the total ampere rating of the equipment plugged into the extension cord does not exceed the extension cord ampere rating. Also, make sure that the total rating of all products plugged into the wall outlet does not exceed the fuse rating.
- Do not overload a power outlet, strip or receptacle by plugging in too many devices. The overall system load must not exceed 80% of the branch circuit rating. If power strips are used, the load should not exceed 80% of the power strip's input rating.
- This product's AC adapter is equipped with a three-wire grounded plug. The plug only fits in a grounded power outlet. Make sure the power outlet is properly grounded before inserting the AC adapter plug. Do not insert the plug into a non-grounded power outlet. Contact your electrician for details.

.....

Warning! The grounding pin is a safety feature. Using a power outlet that is not properly grounded may result in electric shock and/or injury.

.....

Note: The grounding pin also provides good protection from unexpected noise produced by other nearby electrical devices that may interfere with the performance of this product.

- Use the product only with the supplied power supply cord set. If you need to replace the power cord set, make sure that the new power cord is equivalent to the original supplied power cord. Please contact your local dealer or Acer service center for details.

Product servicing

Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage points or other risks. Refer all servicing to qualified service personnel.

Unplug this product from the wall outlet and refer servicing to qualified service personnel when:

- the power cord or plug is damaged, cut or frayed
- liquid was spilled into the product
- the product was exposed to rain or water
- the product has been dropped or the case has been damaged
- the product exhibits a distinct change in performance, indicating a need for service
- the product does not operate normally after following the operating instructions

.....

Note: Adjust only those controls that are covered by the operating instructions, since improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal condition.

.....

Warning! For safety reasons, do not use non-compliant parts when adding or changing components. Consult your reseller for purchase options.

Your device and its enhancements may contain small parts. Keep them out of the reach of small children.

Additional safety information

- Do not look into the lens while the light source is on. The strong light from the light source may cause damage to your eyesight.
RG2 IEC 62471-5:20151
- Do not place anything in front of the lens while the projector is operating. Things placed in front of the lens may overheat and burn or start a fire. If you want to temporarily stop the projected image, use the Blank key on the remote control.
- Do not remove any screws. Do not block or cover the vents.
- Do not look into the lens. (For USA and Canada only).
- Laser aperture warning: (For USA and Canada only).
 - CLASS 3R LASER PRODUCT-AVOID DIRECT EYE EXPOSURE
 - Do not look into the light source using optical instruments (such as magnifying glasses and mirrors). Visual impairment could result.
 - When turning on the projector, make sure no one within projection range is

looking at the lens.

- Keep any items (magnifying glass etc.) out of the light path of the projector. The light path being projected from the lens is extensive, therefore any kind of abnormal objects that can redirect light coming out of the lens, can cause an unpredictable outcome such as a fire or injury to the eyes.
- Laser aperture warning: (For other countries).
 - CLASS 1 LASER PRODUCT - RISK GROUP 2
 - Do not stare into the beam, maybe harmful to the eyes.
- Risk group 3: (Except USA and Canada) This projector may become RG3 when an interchangeable lens with throw ratio greater than the number stated on the label.
 - As with any bright light source, do not stare into the beam.
RG2 IEC 62471-5:2015
 - No direct exposure to the beam shall be permitted. RG3 IEC 62471-5:2015
 - Operators shall control access to the beam within the hazard distance or install the product at the height that will prevent spectators' eyes from being in the hazard distance.
- Hazard distance

Type name of lens	Throw ratio	Hazard distance	IEC62471-5:2015
Acer FL8 series Ultra Short Throw Lens	0.377	N/A	RG2
Acer FL8 series Ultra Short Throw Zoom Lens	0.76–0.95	N/A	RG2
Acer FL8 series Short Throw Zoom Lens	1.14–1.71	N/A	RG2
Acer FL8 series Standard Zoom Lens	1.61–2.42	N/A	RG2
Acer FL8 series Middle Throw Zoom Lens	2.37–3.6	N/A	RG2
Acer FL8 series Long Throw Zoom Lens	3.53–5.65	1550 mm	RG3
Acer FL8 series Ultra Long Throw Zoom Lens	5.52–8.83	1370 mm	RG3

- Cinema projectors that have a hazard distance greater than 1 m and emit light into an uncontrolled area where persons may be present should be positioned in accordance with “the fixed projector installation” parameters, resulting in a hazard distance that does not extend into the audience area unless the beam is at least 2 m above the floor level.

- In non-cinema, environments where unrestrained behaviour is reasonably foreseeable, the minimum separation height should be greater than or equal to 3.0 m to prevent potential exposure, for example by an individual sitting on another individual's shoulders, within the hazard distance. For example, a sufficiently large separation height may be achieved by mounting the projector on the ceiling or through the use of physical barriers.
- Turn on the projector first and then signal sources.
- Do not place the product in the following environments:
 - Space that is poorly ventilated or confined. At least 50cm clearance from walls and free flow of air around the projector are necessary.
 - Locations where temperatures may become excessively high, such as inside of a car with all windows rolled up.
 - Locations where excessive humidity, dust, or cigarette smoke may contaminate optical components, shorten the life span and darken the image.
 - Locations near fire alarms.
 - Locations with an ambient temperature above 40 °C/104 °F.
 - Locations where the altitudes are higher than 10000 feet.
- Unplug immediately if there is something wrong with your projector. Do not operate if smoke, strange noise or odor comes out of your projector. It might cause fire or electric shock. In this case, unplug immediately and contact your dealer.
- Do not keep using this product to break or drop it. In this case contact your dealer for inspection.
- Do not face the projector lens to the sun. It can lead to fire.
- When switching the projector off, please ensure the projector completes its cooling cycle before disconnecting power.
- Do not frequently turn off the main power abruptly or unplug the projector during operation. The best way is to wait for the fan to stop before turning main power off.
- Do not touch the air outlet grille and bottom plate which become hot.
- Clean the air filter frequently. The temperature inside may rise and cause damage when the filter/ventilation slots are clogged with dirt or dust.
- Do not look into the air outlet grille when projector is operating. It may hurt your eyes.
- Always open the lens shutter or remove the lens cap when the projector is on.
- Do not block the projector lens with any object when the projector is under operation as this could cause the object to become heated and deformed or even cause a fire. To temporarily turn off the light, press Blank on the remote control.
- Do not attempt to disassemble this projector. There are dangerous high voltages inside which may hurt you.
- Do not stand the projector on end vertically. It may cause the projector to fall over, causing injury or damage.
- This product is capable of displaying inverted images for ceiling mount installation. Only use acer ceiling mount kit for mounting the projector and ensure it is securely installed.

Caution for Listening

To protect your hearing, follow these instructions.

- Increase the volume gradually until you can hear clearly and comfortably.
- Do not increase the volume level after your ears have adjusted.
- Do not listen to music at high volumes for extended periods.
- Do not increase the volume to block out noisy surroundings.
- Decrease the volume if you can't hear people speaking near you.

Disposal instructions

Do not throw this electronic device into the trash when discarding. To minimize pollution and ensure utmost protection of the global environment, please recycle. For more information on the Waste from Electrical and Electronics Equipment (WEEE) regulations, visit <http://www.acer-group.com/public/Sustainability/index.htm>

First Thing First

Usage Notes

Do:

- Turn off the product before cleaning.
- Use a soft cloth moistened with mild detergent to clean the display housing.
- Disconnect the power plug from AC outlet if the product is not being used for a long period of time.

Don't:

- Block the slots and openings on the projector provided for ventilation.
- Use abrasive cleaners, waxes or solvents to clean the unit.
- Use under the following conditions:
 - In extremely hot, cold or humid environments.
 - In areas susceptible to excessive dust and dirt.
 - Near any appliance that generates a strong magnetic field.
 - Place in direct sunlight.

Precautions

Follow all warnings, precautions and maintenance as recommended in this user's guide to maximize the life of your unit.

Warning:

- Do not look into the projector's lens when the projector is on. The bright light may hurt your eyes.
- To reduce the risk of fire or electric shock, do not expose this product to rain or moisture.
- Please do not open or disassemble the product as this may cause electric shock.
- When switching the projector off, please ensure the projector completes its cooling cycle before disconnecting power.
- Turn on the projector first and then the signal sources.
- Do not use lens cap when projector is in operation.

Introduction

Product Features

This product is a single-chip DLP® projector, including the following outstanding features:

- DLP® technology
- Enables projecting 3D content via DLP Link Technology: Blu-Ray 3D supported
- Acer ColorBoost technology delivers vivid, life-like images
- High brightness and contrast ratio
- Versatile display modes enable optimum performance in any situation
- NTSC/PAL/SECAM compatible and HDTV (720p, 1080i, 1080p) supported
- Lower power consumption and economy (ECO) mode extends projector life
- Advanced keystone correction delivers optimum presentations
- Multi-language Onscreen Display (OSD) menus
- Extensive lens options with motorized focus/zoom and motorized lens shift functions
- Equipped with motorized dual color filter
- Optional 3G-SDI module and HDBaseT module
- 360-degree projection allows you to project images from any angle
- Microsoft® Windows® 2000, XP, 7, 8, 8.1, 10, Vista®, Macintosh OS, Chrome OS compliant
- LAN settings enable remote management of projectors via a web browser
- Crestron compliant
- CEC (Consumer Electronics Control) function supported
- 3D VESA compatible

Package Overview

This projector comes with all the items shown below. Check to make sure you have them all. Contact your dealer immediately if any thing is missing.

Projector

Power cord

VGA cable

Security card
(optional)

Remote control

Quick start guide

AAA Battery x 2

3G-SDI module
(optional)

HDBaseT module
(optional)

Note: Do not install 2 HDBaseT modules or 2 3G-SDI modules simultaneously. The projector can only recognize one when that happens.

Warning: Do not leave the optional extension board uncovered during operation.

Control Panel

#	Function	Description
1	Power key	Refer to the "Turning the Projector On/Off" section.
2	PATTERN	Displays the test pattern.
3	MENU	Launches the Onscreen Display (OSD) menu, returns to the previous step for the OSD menu operation or exits the OSD menu.
4	ENTER	Confirms your selection of items.
5	 Four directional selection keys	Selects items or makes adjustments to your selection
6	BACK	Cancels your selection, or goes back to previous page.
7	FOCUS	Press "FOCUS" and the indicator below lights up. Use  to adjust the focus setting.
8	LENS SHIFT	Press "LENS SHIFT" and the indicator below lights up. Use  to shift the projection lens.
9	LIGHT	Turns on or off the back light of the control panel.
10	SOURCE	Changes the active source.
11	RESYNC	Automatically synchronizes the projector to the input source.
12	ZOOM	Press "ZOOM" and the indicator below lights up. Use  to adjust the zoom setting.

Remote Control Layout

#	Function	Description
1	ON	Refer to the "Turning the Projector On/Off" section.
2	OFF	
3	Video	To change source to composite video.
4	VGA	To change source to VGA IN.
5	HDMI1	To change source to HDMI.
6	BNC	To change source to BNC.
7	S-Video	To change source to S-Video.
8	DVI-D	To change source to DVI-D.
9	Four directional selection keys	Selects items or makes adjustments to your selection.
10	ENTER	Confirms your selection of items.
11	Keystone	Displays the Keystone correction menu.
12	Menu	Launches the Onscreen Display (OSD) menu, returns to the previous step for the OSD menu operation or exits the OSD menu.
13	Back	Cancels the selection, or goes back to previous page.
14	Lens Shift	Press "Lens Shift" and the indicator below lights up. Use to shift the projection lens.

#	Function	Description
15	Zoom	Press "Zoom" and the indicator below lights up. Use  to adjust the zoom setting.
16	Focus	Press "Focus" and the indicator below lights up. Use  to adjust the focus setting.
17	Picture	Selects the preset picture mode.
18	Pattern	Displays the test pattern.
19	Blank	Press "Blank" to hide screen image; press again to display the image.
20	Freeze	To pause the screen image.
21	Aspect	Chooses your desired aspect ratio.
22	ECO	Dims the projector light source which will lower power consumption and extend the light source life.
23	Set	Set the code for this remote control. Press and hold "Set", and then press a number (01, 02, 03...99) to designate an ID. You can control projector with the matching ID set in the "Options" > "Control" > "Projector ID" OSD. Press and hold "Set" and press "0" twice to cancel the remote control code.
24	INFO	Displays the current projector related information.
25	Lens Lock	Displays the Lens Lock menu.
26	Lens	Displays the Lens menu.
27	Network	Displays the Network menu.
28	HSG	Displays the HSG menu.
29	Language	Displays the OSD language selection menu.
30	Security	Displays the Security menu.
31	3D	Press to open the 3D menu for adjusting 3D settings.
32	Source	Changes the active source.
33	Keypad 0~9	Inputs numbers.

MHL Feature Introduction

Press "SOURCE" for one second to enter or leave the MHL control mode. After entering the MHL control mode, press "RESYNC" to switch between the navigation mode (default) and numeric mode.

Function		Description	
		Navigation mode	Numeric mode
SOURCE		Long press for one second to enter or leave the MHL control mode.	
RESYNC		After entering the MHL control mode, press to switch between the navigation mode (default) and numeric mode.	
 Four directional select keys	Up	Up	(No function)
	down	down	(No function)
	Left	Left	(No function)
	Right	Right	(No function)
Keypad 0~9		(No function)	Enters 0~9.
MENU		Goes to the root menu.	(No function)
ENTER		Selects or enters items.	(No function)
BACK		Exits current page.	(No function)

Getting Started

Installing the Projection Lens

- 1 Remove the dust cap and upper lens cover.
- 2 Align the slot on the projection lens with the one on the projector to insert the projection lens. (Illustration #1)
- 3 Turn the lever counterclockwise until you feel it click into place to lock the lens in position. (Illustration #2)
- 4 Install the upper lens cover back. (Illustration #3)

Compatible projection lens

- Acer FL8 series Standard Zoom Lens (MC.JNN11.001)
- Acer FL8 series Ultra Short Throw Lens (MC.JNN11.00A)
- Acer FL8 series Ultra Short Throw Zoom Lens (MC.JNN11.002)
- Acer FL8 series Short Throw Zoom Lens (MC.JNN11.003)
- Acer FL8 series Middle Throw Zoom Lens (MC.JNN11.004)
- Acer FL8 series Long Throw Zoom Lens (MC.JNN11.005)
- Acer FL8 series Ultra Long Throw Zoom Lens (MC.JNN11.006)

Removing the Projection Lens

- 1 Remove the upper lens cover. (Illustration #1)
- 2 Turn the lever clockwise to release the lens. (Illustration #2)
- 3 Pull out the projection lens. (Illustration #3)

Connecting the Projector

#	Description	#	Description
1	Power cord	9	3 RCA component cable
2	Wired remote control	10	HDMI (MHL) cable
3	RS232 cable	11	DVI cable
4	S-Video cable	12	USB cable
5	Composite video cable	13	RJ45 cable
6	S-BNC cable	14	3D glasses
7	VGA cable	15	3G-SDI cable
8	VGA to component video/HDTV adapter		

Note: To ensure the projector works well with your computer, please make sure the timing of the display mode is compatible with the projector.

Note: Some smart devices require a converter (supplied by the smart device maker) to enable the MHL function.

Connecting Multiple Sources through HDBaseT Module (Optional)

HDBaseT is a connectivity standard for whole-house and commercial distribution of uncompressed HD multimedia content. After installing the HDBaseT module (optional) to the projector and using the HDBaseT switching matrix (commercially available), you may connect multiple sources to your projector with HDBaseT connection.

Note: The illustration below is for reference only, actual layout may vary.

Note: Use a shielded LAN cable up to 100 meters in length rated at CAT5e or better.

Note: The maximum transmission distance is 100 m. However, it may be shorter under some circumstances.

Note: Avoid using the LAN cable when it is coiled or bundled.

Note: Inserting or removing the LAN cable during projection may cause noise.

Note: Connectivity with all HDBaseT transmitters on the market is not guaranteed.

Note: Some HDBaseT transmitters may not enable correct projection when used to connect source equipment to the projector.

Note: Commands cannot be received through HDBaseT when the projector is in standby mode.

Turning the Projector On/Off

Turning On the Projector

- 1 Ensure that the power cord and signal cable are securely connected. The Power LED will light red.
- 2 Turn on the projector by pressing  (POWER) on the control panel or  on the remote control, and the Power indicator LED will turn blue.
- 3 Turn on your source (computer, notebook, video player, etc.). Select your source. (The projector will detect your source automatically if Auto Source is "On").
 - If the screen displays "No Signal", please make sure the signal cables are securely connected.
 - If you connect to multiple sources at the same time, use "SOURCE" on the control panel or remote control, or the direct source key on the remote control to switch between inputs.

Turning Off the Projector

- 1 To turn the projector off, press the power button. This message appears:
"Please press power button again to complete the shutdown process"
Press the power button again.
- 2 The LED Power indicator will turn solid red to indicate standby mode.
- 3 It is now safe to unplug the power cord.

Adjusting the Projected Image

Adjusting the Height of the Projected Image

The projector is equipped with two elevator feet for adjusting the image height.

To raise the image:

- 1 Use the front Tilt adjusting wheels to raise the image to the desired height and angle.
- 2 Use the rear Tilt adjusting wheels to fine-tune the display angle.

To lower the image:

- 1 Use the front Tilt adjusting wheels to lower the image to the desired height angle.
- 2 Use the rear Tilt adjusting wheels to fine-tune the display angle.

Optimizing Image Size and Distance

Only with the following lenses:
 Acer FL8 series Standard Zoom Lens/
 Acer FL8 series Middle Throw Zoom Lens/
 Acer FL8 series Long Throw Zoom Lens/
 Acer FL8 series Ultra Long Throw Zoom Lens

[A] differs when different lens is installed.

Lens installed	[A]

How to Get a Preferred Image Position by Adjusting Lens Shift

The projector is equipped with lens shift for adjusting the position of projected image without requiring you to physically move the projector. To shift the lens, use the control panel or remote control, or select "Display settings" > "Lens" on the OSD and adjust the lens.

Note: The figures shown in this section are for reference only not approximate value. The figures between units can be different due to assembly tolerance.

The horizontal width can be adjusted between -10% and 10% of the image width. The vertical height can be adjusted between 0% and 50% – 60% (depending on the projection lens installed) of the image height.

The horizontal position

The vertical position

Note: [B] differs when different lens is installed.

Lens installed	[B]
Acer FL8 series Standard Zoom Lens	60%
Acer FL8 series Ultra Short Throw Zoom	50%
Acer FL8 series Short Throw Zoom Lens	60%
Acer FL8 series Middle Throw Zoom Lens	60%
Acer FL8 series Long Throw Zoom Lens	60%
Acer FL8 series Ultra Long Throw Zoom Lens	60%
Acer FL8 series Ultra Short Throw Lens	83.2%

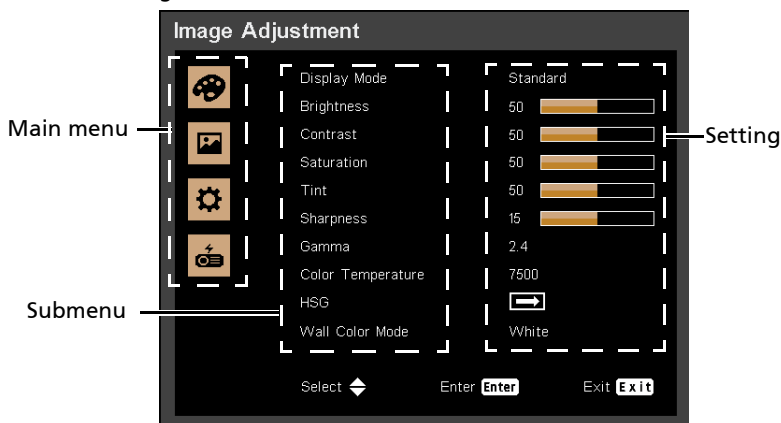

User Controls

Onscreen Display (OSD) Menus

The projector has multilingual Onscreen Display (OSD) menus that allow you to make image adjustments and change a variety of settings.

Using the OSD menus

- To open the OSD menu, press "MENU" on the control panel or remote control.
- When the OSD is displayed, use ▲ ▼ to select an item in the main menu. After selecting the desired main menu item, press ► to enter a submenu for feature setting.
- Use ▲ ▼ to select the desired item and adjust the settings by using ◀ ▶.
- Select the next item to be adjusted in the submenu and adjust as described above.
- Press "MENU" on the control panel or remote control, the screen will return to the main menu.
- To exit the OSD menu, press "MENU" on the control panel or remote control again. It will close and the projector will automatically save the new settings.

Note: Some of the following OSD settings may not be available. Please refer to the actual OSD of your projector.

Image Adjustment

Display Mode	<p>There are many factory presets optimized for various types of images.</p> <ul style="list-style-type: none"> • Bright: For brightness optimization. • Standard: For common environment. • Video: For playing video in a bright environment. • sRGB: For sRGB standard. • DICOM SIM: For DICOM format files in simulation mode, and not for actual diagnosis. • User: Memorize user's settings.
Brightness	<p>Adjusts the brightness of the image.</p> <ul style="list-style-type: none"> • Press ◀ to darken the image. • Press ▶ to lighten the image.
Contrast	<p>Controls the degree of difference between the lightest and darkest parts of the picture. Adjusting the contrast changes the amount of black and white in the image.</p> <ul style="list-style-type: none"> • Press ◀ to decrease the contrast. • Press ▶ to increase the contrast.
Saturation	<p>Adjusts a video image from black and white to fully saturated colors.</p> <ul style="list-style-type: none"> • Press ◀ to decrease the amount of color in the image. • Press ▶ to increase the amount of color in the image.
Tint	<p>Adjusts the color balance of red and green.</p> <ul style="list-style-type: none"> • Press ◀ to increase the amount of green in the image. • Press ▶ to increase the amount of red in the image.
Sharpness	<p>Adjusts the sharpness of the image.</p> <ul style="list-style-type: none"> • Press ◀ to decrease the sharpness. • Press ▶ to increase the sharpness.
Gamma	<p>Effects the representation of dark scenery. With greater gamma value, dark scenery will look brighter.</p>

Color Temperature	Adjusts the color temperature. At higher color temperatures, the screen looks colder; at lower color temperatures, the screen looks warmer.
HSG	<p>HSG Use this function to enhance color and reproduce vivid colors.</p> <p>HSG settings</p> <ul style="list-style-type: none"> • Color: Use ◀ ▶ key to select a color that you wish to enhance. • When selecting Red/Green/Blue/Cyan/Magenta/Yellow, the following options are available. <ul style="list-style-type: none"> - Hue: Use ◀ ▶ key to change the hue of the selected color. - Saturation: Use ◀ ▶ key to change the saturation of the selected color. - Gain: Use ◀ ▶ key to change the contrast level of the selected color. • When selecting White, the following options are available. <ul style="list-style-type: none"> - Red/Green/Blue: Use ◀ ▶ key to change the level of each color. - Reset: Use this function to return the adjustments and settings made above to the factory default values.
Wall Color Mode	Use this function to choose a proper color according to the wall. There are several choices, including White, Light Yellow, Light Blue, Pink and Dark Green. It will compensate for the color deviation due to the wall color to show the correct image tone.

.....

Note: "Saturation" and "Tint" functions are not supported under computer mode.

Display settings

Aspect Ratio	<p>Use this function to choose your desired aspect ratio.</p> <ul style="list-style-type: none"> • Auto: Keeps the image with original width-height ratio and maximizes the image to fit native horizontal or vertical pixels. • 4:3/16:9/16:10/1.88:1/2.35:1: The image will be scaled to fit the screen and displayed using a 4:3/16:9/16:10/1.88:1/2.35:1 ratio.
Phase	<p>Eliminates flicker from the image displayed. Use ◀ ▶ key to adjust the value.</p>
Frequency	<p>Changes the projector's refresh rate to match the frequency of your computer's graphics card. If you experience a vertical flickering bar in the projected image, use this function to correct it.</p>
H. Position	<ul style="list-style-type: none"> • Press ◀ to move the image left. • Press ▶ to move the image right.
V. Position	<ul style="list-style-type: none"> • Press ◀ to move the image down. • Press ▶ to move the image up.
Keystone	<p>V. Keystone Manually adjusts image distortion caused by tilting projection.</p>  <p>H. Keystone Manually adjusts image distortion caused by tilting projection.</p>  <p>Four Corners Use ◀ ▶ key to select which corner to adjust and press the "ENTER" key to enter its submenu. Use ▲ ▼ ◀ ▶ key to adjust the setting.</p>

Lens	<p>Lens Settings</p> <ul style="list-style-type: none"> • Lens Lock: Selecting Yes will lock all the functions provide in this menu and the Lens Centering menu. You will not be able to change lens related settings. • Lens Shift: Press ◀ ▶ to select Normal Speed or Fine Tune to determine how fast you want the lens to move. After selection, press ENTER to enable the lens shift function, and use ▲ ▼ ◀ ▶ to adjust the projection position. • Focus: Adjusts the projector's focus. • Zoom: Adjusts the size of the projected image. • Load Settings: Applys the settings that you previously saved. • Save Settings: After making lens shift, zoom and focus adjustments, you can choose a set of setting to memorize current lens settings. • Clear Settings: Clears the settings. <p>Lens Centering Returns the lens to the centered position.</p>
Advanced	<p>RGB Input Range Adjusts the color range of the HDMI image data to prevent color display error.</p> <ul style="list-style-type: none"> • Auto: Automatically adjusts the color range by information from the player. • Limited Range: Processes the input image as limited color range data. • Full Range: Processes the input image as full color range data. <p>Overscan Use this function to conceal the poor picture quality in the four edges.</p> <p>Start-up Screen Use this function to select your desired startup screen. If you change the setting, it will take effect when you exit the OSD menu.</p> <p>Background on No Signal Use this function to select a background image to be displayed when no signal is detected.</p>

Advanced	<p>Screen Capture Use this function to customize the startup screen. To capture the image that you want to use as the startup screen, follow the instructions below.</p> <p> -----</p> <p>Before proceeding with the following steps, make sure that the "Keystone" is set to the default value "0".</p> <ol style="list-style-type: none"> 1 Project the image you want you capture. 2 Select "Screen Capture" and press "ENTER". 3 A dialog box appears to confirm the action. Choose "Yes" to use the current image as your customized startup screen. Choose "No" to cancel the screen capture and exist the Onscreen Display (OSD). 4 A message appears stating that the screen capture is in progress. 5 When the screen capture is finished, the message disappears and the original display is shown. 6 If the screen capture failed, a "Screen Capture FAILED!" message will pop up. Your image size may exceed the maximum capturing capacity of 8 MB. Please change another image and try again. 7 To use this image as the startup screen, change the "Start-up Screen" from the default setting to "User". 8 To use this image as signal searching screen, select "User" in "Start-up Screen" and "User" in "Background on No Signal". <p>Test Pattern Displays the test pattern.</p> <p>Closed Caption Selects a preferred closed captioning mode from CC1, CC2, CC3, CC4 (CC1 displays captions in the primary language in your area). Select "Off" to turn off the captioning feature. This function is only available when a composite video or S-Video input signal is selected and its system format is NTSC.</p>
----------	--

Note: "H. Position", "V. Position", and "Frequency" functions are not supported under video mode.

Note: "RGB Input Range" is only available when the input signal is HDMI.

Default Adjustment

Language	Sets a language for the OSD menus. Use ▲ ▼ to select your preferred language.
Menu Display Time	Sets the length of time the On Screen Display will remain active after your last key press.
Menu Position	Sets the On Screen Display menu position.
Projector Installation	<ul style="list-style-type: none"> •  Front Table: The factory default setting. •  Front Ceiling: When you select this function, the projector inverts the image for ceiling-mounted projection. •  Rear Table: When you select this function, the projector reverses the image so that you can project behind a translucent screen. •  Rear Ceiling: When you select this function, the projector reverses and inverts the image at same time. You can project from behind a translucent screen with ceiling mounted projection.
Auto Source	When this function is turned "On", the projector will search for other signals if the current input signal is lost. When this function is turned "Off", it will only search a specified connection port.
Input Source	Use this option to enable/disable input sources. Press "ENTER" to enter the sub menu and select which sources you require. Press "ENTER" to finalize the selection. The projector will only search for inputs that are enabled.
Power Settings	<p>AC Power On Selecting "On" enables the function. The projector will automatically turn on when power is supplied via the power cord.</p> <p>IO Power On Selecting "On" to enables this function. The projector will automatically turn on when a VGA signal is detected, without pressing the power button.</p> <p>Power Off Notice When "On" is selected, a power off message will be displayed after pressing the  button. When "Off" is selected, the projector turns off after pressing the  button one time.</p> <p>Date & Time Sets the date and time for this projector.</p> <p>Auto Power Off (min) The projector will automatically shut down while there is no signal input detected after the time you set.</p> <p>Customize Power Off (Hours)</p>

	Schedules automatic shutdown of the projector.
Standby Settings	<p>VGA Out Selecting "On" enables the function. The projector can output a VGA signal when it is in standby mode and the VGA IN (or VGA IN 1) and VGA OUT sockets are correctly connected to the devices.</p> <p> ----- Enabling this function slightly increases the standby power consumption.</p> <p>Network Enables/Disables the network function.</p> <p>DC 5V Out Selecting "On" enables the function. Both micro USB cable inside the projector and the DC 5V out port/USB A port (if available) on the back of the projector can output 5V power when it is in standby mode.</p> <p> ----- Enabling this function slightly increases the standby power consumption.</p> <p>HDBaseT IR Carrier Use this function to enable HDBaseT IR Carrier.</p>
Network	<p>Status Displays the network connection status.</p> <p>DHCP Select On to allow the projector to obtain an IP address automatically from your network. Select "Off" to manually assign IP, Subnet Mask and Gateway configuration.</p> <p>IP Address Set an IP address or display IP address provided from DHCP server when DHCP is set to "On".</p> <p>Subnet Mask Set subnet mask number or display subnet mask number provided from DHCP server when DHCP is set to "On".</p> <p>Apply Select "Yes" to apply the changes made in network configuration settings.</p> <p>MAC Address Displays MAC address.</p>

Security Settings	<p>Password Protection Select "On" to use the security verification when the turning on the projector. Select "Off" to be able to switch on the projector without a password verification.</p> <p>Change Password Sets the password.</p> <p>Lock to User Startup Screen Use this function to lock the Startup Screen and it cannot be changed by the "Start-up Screen" or "Screen Capture" function.</p>
Reset	Press "ENTER" after choosing "Yes" to return the display parameters on all menus to the factory default settings.

About Network Setting

Note 1 : An overview of the remote network operation page

To switch input signals, click your desired signal.

See Note 2 and Note 3.

These buttons function the same as those on the OSD menus, projector control panel, or remote control.

Note 2 : An overview of the Tools page

You can enter the projector information.

You can adjust the LAN control settings.

You can set the user password/ administrator password to prevent unauthorized use of the remote network operation/Tools page.

Note 3: The Info page shows the projector information and status.

Note: Supported 3D signal timings:

Signal source type	Supported timing
Video/S-Video/Component video	HQF5 3D (480i@60Hz), 576i@50Hz
VGA/HDMI (PC mode)	640 x 480@50/60/100/120Hz 800 x 600@50/60/100/120Hz 1024 x 768@50/60/100/120Hz 1280 x 800@50/60/100/120Hz (RB)

HDMI (Video mode)	HQFS 3D (480i@60Hz), 576i@50Hz, Frame Packing (1080p@23.98/24Hz, 720p@50/60Hz) Side-by-Side Horizontal (1080i@50/60Hz, 1080p@50/60Hz) Top-and-Bottom (720p@50/60Hz, 1080p@23.97/24Hz, 1080p@50/60Hz)
-------------------	--

It needs correct settings on graphics card 3D application program for correct 3D display.

Appendices

Troubleshooting

If you experience a problem with your Acer projector, refer to the following troubleshooting guide. If the problem persists, please contact your local reseller or service center.

Image Problems and Solutions

#	Problem	Solution
1	No image appears onscreen	<ul style="list-style-type: none"> • Make sure all the cables are correctly connected as described in the "Getting Started" section. • Ensure none of the connector pins are bent or broken. • Make sure the projector is switched on.
2	Partial, scrolling or incorrectly displayed image (For PC)	<ul style="list-style-type: none"> • Press "RESYNC" on the control panel or remote control. • For an incorrectly displayed image: <ul style="list-style-type: none"> • Open "My Computer > Control Panel," and then double-click the "Display" icon. • Select the "Settings" tab. • Verify that your display resolution setting is lower than or equal to 1600 x 1200 or 1920 x 1080. • Click the "Advanced Properties" button. <p>If the problem still appears, change the monitor display you are using and follow the steps below:</p> <ul style="list-style-type: none"> • Verify that the resolution setting is lower than or equal to 1600 x 1200 or 1920 x 1080. • Click the "Change" button under the "Monitor" tab. • Click "Show all devices > Standard monitor types" under the SP box, and choose the resolution mode you need under the "Models" box. • Verify that the resolution setting of the monitor display is lower than or equal to 1600 x 1200 or 1920 x 1080.

3	Partial, scrolling or incorrectly displayed image (For notebooks)	<ul style="list-style-type: none"> Press "RESYNC" on the control panel or remote control. For an incorrectly displayed image: <ul style="list-style-type: none"> Follow the steps for item 2 (above) to adjust the resolution of your computer. Press the toggle output settings. Example: [Fn]+[F4], Compaq [Fn]+[F4], Dell [Fn]+[F8], Gateway [Fn]+[F4], IBM [Fn]+[F7], HP [Fn]+[F4], NEC [Fn]+[F3], Toshiba [Fn]+[F5] If you experience difficulty changing resolutions or your monitor freezes, restart all equipment including the projector.
4	The screen of the notebook computer is not displaying your presentation	<ul style="list-style-type: none"> If you are using a Microsoft® Windows® based notebook: Some notebook PCs may deactivate their own screens when a second display device is in use. Each has a different way to be reactivated. Refer to your computer's manual for detailed information. If you are using an Apple® Mac® OS based notebook: In System Preferences, open Display and select Video Mirroring "On."
5	Image is unstable or flickering	<ul style="list-style-type: none"> Change the display color setting on your computer.
6	Image has vertical flickering bar	<ul style="list-style-type: none"> Use "Frequency" to make an adjustment. Refer to the "Display settings" section for more information. Check and reconfigure the display mode of your graphics card to make it compatible with the projector.
7	Image is out of focus	<ul style="list-style-type: none"> Adjust the focus ring on the projector lens. Make sure the projection screen is within the required distance. <p>Refer to the "Optimizing Image Size and Distance" section for more information.</p>
8	Image is stretched when displaying a "widescreen" DVD title	<p>When you play a DVD encoded in anamorphic or 16:9 aspect ratio you may need to adjust the following settings:</p> <ul style="list-style-type: none"> If you play a 4:3 format DVD title, please change the format to 4:3 with the projector OSD. If the image is still stretched, you will also need to adjust the aspect ratio. Set up the display format to 16:9 (wide) aspect ratio on your DVD player.

9	Image is too small or too large	<ul style="list-style-type: none"> • Adjust the zoom lever on the top of the projector. • Move the projector closer to or further from the screen. • Press "MENU" on the control panel or remote control. Go to "Display settings" > "Aspect Ratio" and try different settings.
10	Image has slanted sides	<ul style="list-style-type: none"> • If possible, reposition the projector so that it is centered on the screen and below the bottom of the screen. • Perform keystone correction (if available). • Press "MENU" on the control panel or remote control to open the OSD menu. Go to "Keystone" to make adjustments.
11	Image is reversed	<ul style="list-style-type: none"> • Select "Default Adjustment" > "Projector Installation" on the OSD and adjust the projection direction.

Problems with the Projector

#	Condition	Solution
1	The projector stops responding to all controls	If possible, turn off the projector, then unplug the power cord and wait at least 30 seconds before reconnecting power.

OSD Messages

#	Condition	Message Reminder
1	Message	<p>Fan Fail - the system fan is not working.</p> <p>Laser will automatically turn off soon.</p> <p>Projector Overheated - the projector has exceeded its recommended operating temperature and must be allowed to cool down before it is used. Please also check the dust filters if they are installed. If the dust filter is clogged with dust, please clean it.</p> <p>Laser will automatically turn off soon.</p> <p>Replace the liquid cooler</p> <p>The water from liquid cooler is insufficient. Contact the service center for replacement.</p>

	S-Video	NTSC		HQFS	

Regulations and Safety Notices

Declaration of Conformity for EU countries

Acer hereby, declares that this projector series is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

Compliant with Russian/Ukraine/Belarus regulatory certification

Radio device regulatory notice

.....
Note: The regulatory information below is for models with wireless LAN and/or Bluetooth only.

General

This product complies with the radio frequency and safety standards of any country or region in which it has been approved for wireless use. Depending on configurations, this product may or may not contain wireless radio devices (such as wireless LAN and/or Bluetooth modules).

List of applicable countries

This device must be used in strict accordance with the regulations and constraints in the country of use. For further information, please contact a local office in the country of use. Please see <http://ec.europa.eu/enterprise/rtte/implem.htm> for the latest country list.
