
Intel ME FW Update S.O.P.

Ver .1.0

Instructions:

Important: After updating the Intel ME FW successfully, the system will restart automatically, so please save all your work before executing this ME FW update tool.

Step 1. In Windows OS, unzip the compressed file of Intel ME FW update package “B4DBU_B5PBS_ME_Update_Tool_11.0.25.3001.7z”, and save the Intel ME FW update file “B4DBU_B5PBS_ME_Update_Tool_11.0.25.3001.exe” to your computer.

(In this example, the files are unzipped and saved to “C:\” location.)

Step 2. Plug-in the AC power source.

Step 3. Please press the Windows Key Shortcuts “WINKEY  + X” on the keyboard to open the Quick Link menu, and then choose “Command Prompt (Admin)”.

Step 4. (If User Account Control is enabled,) System will pop up a question window: “Do you want to allow the following program to make changes to this computer?” Please choose “Yes” as respond.

Step 5. Change to the path where “B4DBU_B5PBS_ME_Update_Tool_11.0.25.3001.exe” was saved to in step 1 (i.e. “C:\” in this case) with Command Prompt window.

(In this example, the file is unzipped and saved to “C:\” location.)

```
Administrator: Command Prompt
Microsoft Windows [Version 6.3.9600]
